

IL DOMINO DELLE FRAZIONI

Si può giocare da soli o in compagnia.

Esempio a coppie: si mischiano le carte e se ne consegnano 9 ciascuno. Il primo (a scelta) mette sul tavolo il primo tassello, si continua come un normale domino e si cerca di chiudere il serpente che si forma con la prima frazione del primo tassello appoggiato. Vince chi non mette l'ultimo tassello.

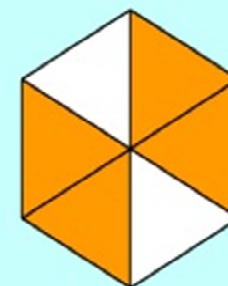

Questo gioco si può fare anche con tutta la classe con i tasselli più grandi (A4 → da creare!). Ognuno riceve un tassello e deve posizionarsi fisicamente formando attorno ai banchi il serpente del domino.
